

PANEL BONDING

NOISE REDUCTION WITH SIKADAMP®-620

SikaDamp®-620

Elastomeric layer with aluminum flashing rolled on vibrating substrate

- Easy to apply

Reduction of

- **Structure-borne vibrations**
(fluttering)
- **External impacts**
(rain drops and hail grains)

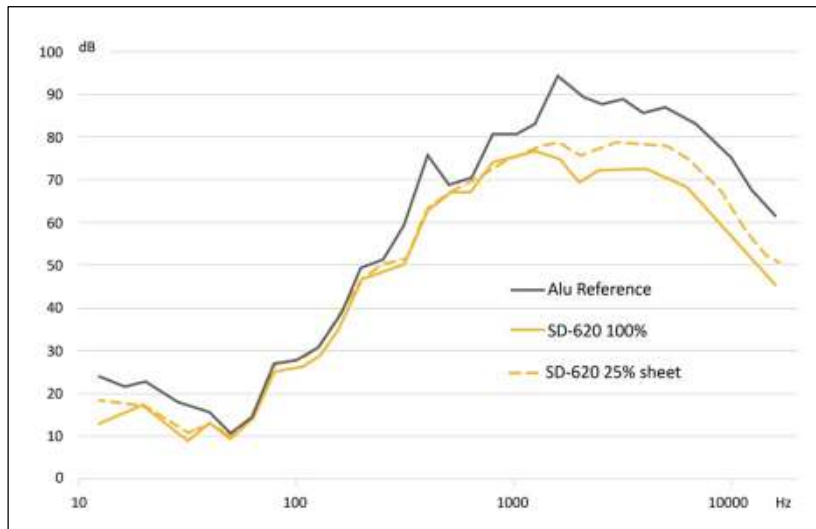

PANEL BONDING

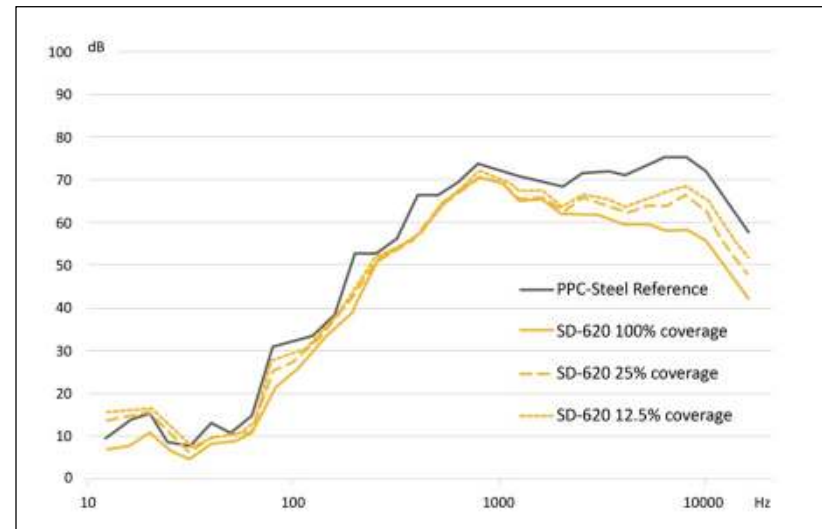

NOISE REDUCTION WITH SIKADAMP[®]-620

Aluminum

PPC Steel

- Remarkable noise reduction on steel and aluminum
- Noise reduction performance depends on many factors
→ Coverage to be evaluated individually for each construction detail
